The cabin air filter CUK 2940 in a new Design!

The cabin air filter CUK 2940 has been changed in design. Due to that it now visually differs from the predecessor.

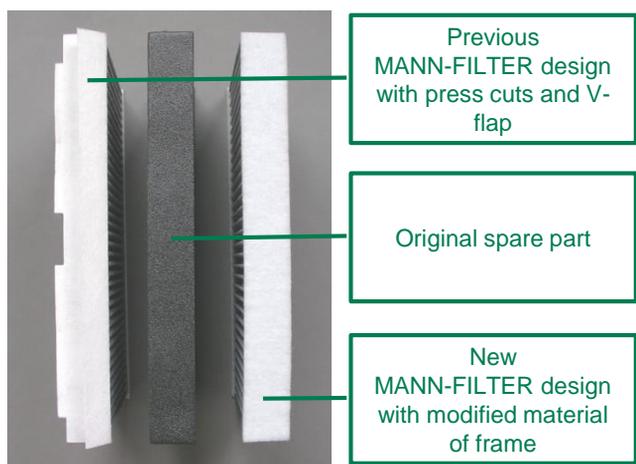

What is different?

The material of the frame at the longitudinal side of the CUK 2940 has been changed. Therefore the original press cuts and the V-flap can be removed.

Why was that change in design of CUK 2940 was made?

A change in design has been made to the original spare part. According to that the CUK 2940 has also been adapted.

The new material of the frame at the longitudinal side still cares for an optimal sealing in the filter seat.
