Product Information

No. 162
06.11.2020

New MANN-FILTER C 26 025 fitting EURO 6 applications

MANN-FILTER follows a change in the Original Equipment and has adapted the design of C 26 025. Due to a new housing structure for EURO 6 vehicles, the old version was not mountable in new applications.

The new design of the MANN-FILTER C 26 025 air filter features accustomed easy fitment and reliable OE quality for both old and new applications.

Old version of C 26 025:
Orange-black endplate and small
hole diameter

New version of C 26 025:
Salmon pink-black endplate and big
hole diameter

The old version can still be used for all applications, except EURO 6 versions. It will be replaced in the market by the new version gradually.
