

MANN-FILTER

Product Information

No. 169
10.08.2021

Housing cover gaskets for several Oil Filter Elements

We will temporarily use o-rings made from an alternative black elastomer besides the known white o-rings on the filters listed below. O-rings from both materials are functionally approved and can be used without hesitation.

These o-rings are used as seal for the housing cover and are supplied with the Oil Filter Element.

This may relate to the following MANN-FILTER Oil Filter Elements:

HU 931 x
HU 931/6 x
HU 931/7 x
HU 942/1 x
HU 945/3 x
HU 6018 z
HU 8010 z
HU 8012 z
HU 12 001 z
HU 12 122 x

MANN-FILTER provides the accustomed OE quality despite the differing gasket colour.

MANN-FILTER – Perfect parts. Perfect service.
