

MANN-FILTER

Product Information

No. 168
23.07.2021

Product change: PU 9001 x is now PU 9001/1 x

PU 9001 x is replaced by PU 9001/1 x in the fuel filter program of MANN-FILTER. The difference is the omission of a cap on one end plate:

PU 9001 x with cap

PU 9001/1 x without cap

Both filters are identical regarding the performance data and fitting measurements. Therefore the PU 9001/1 x provides the familiar original equipment quality of a fuel filter from MANN-FILTER.
