

MANN-FILTER

Product information

No. 197
10.12.2024

C 31 014 / C 31 016 / C 31 017 / C 31 018 Design change on Air Filters for Scania applications

MANN-FILTER changes design and look of the Air Filters
C 31 014 / C 31 016 / C 31 017 und C 31 018:

- Closed end disc with eight separate positioning pins instead of a closed contour
- Stabilization of filter media pleats by proven Glue String Technology (GST) instead of plastic grids
- Center tube of element made of stable perforated sheet metal, previously expanded metal
- PUR end panel in typical MANN-FILTER pink instead of black, thus improved legibility of element lettering

As part of the design changes, the country of manufacture of these elements has also changed from Poland to Germany.
