SKF Pre-greased CV-Joint kits

SKF CV-Joint kit content improvements

The SKF CV-joint kit content have been optimized in order to supply more performant products. The grease, currently supplied into plastic bags, is replaced by automatic and accurate industrial pre-greasing of the CV-Joints. The benefits are the following:

- ✓ Right grease quantity, located where it has to be deepened into the CV-Joint, where it maximizes its function, No need anymore to evaluate how much grease is needed!
- ✓ No need to cut the grease bag and squeeze the grease into the boot, avoiding the risk of dirtiness and misplacing it.
- ✓ Sustainable solution with less waste!

BEFORE
CV-Joint with grease
into plastic bags

AFTER
Pre-greased CV-Joint
