

Service-Information

Technical Information 07/13

Modifiziertes Wasserpumpengehäuse:

Concerns water pump : P324

Inducement:

In this revised version, the drainage tank was modified. This adjustment was based on the change in the corresponding OE pump.

NOTICE:

During the transition period, it may come to the delivery of both versions. Both versions can be used without restriction for vehicles listed in the catalog.

General instructions:

1. Only work on a cold engine!
2. The cooling system must be well flushed!
3. Clean the sealing surface on the engine thoroughly !
4. Use only fresh coolant
-The old coolant must be disposed of properly!
5. Please observe the instructions of the manufacturer with regard to compliance of the tightening torques and the order of tightening of the screws!
6. Never start the engine without coolant!
The dry running destroy the mechanical seal

Important note:

Please note the specifications of the vehicle manufacturer!
